

Air pollution is a problem in Scotland

There are 41 Air Quality Management Areas in Scotland which are at levels **damaging to human health**.¹

Am I at risk?

Yes. It is especially harmful to children, older people, pregnant women and people with existing health conditions. Air pollution is often worse in inner-city areas increasing inequalities in health.

Can it affect my health?

Yes. It can cause acute harm to our heart and lungs and chronic harm to every organ in the body. It is linked to pregnancy loss, premature birth, low birth weight and can affect lung development.²

Can it be fatal?

Yes. It is considered the biggest environmental health risk across Europe.³ In the UK it is linked to 28,000-36,000 premature deaths a year.⁴

Air pollution is linked to over 1700 premature deaths a year in Scotland.⁵

What causes air pollution?

Traffic is the number one cause of air pollution in Scotland.⁶ Other sources include domestic wood burning and industrial facilities such as power plants, refineries, factories and agriculture.

Is my air pollution monitored?

Possibly. There is live air monitoring from 100 sites around Scotland which can be found on this [website](#). The 41 Air Quality Management Areas can be found on this [website](#).

What is the Scottish Government doing?

Cleaner Air For Scotland 2 is Scotland's strategy to comply with EU⁷ and UK-wide air quality standards.⁸ Low Emission Zones will be in Aberdeen, Dundee, Edinburgh and Glasgow.

We all have the right to
CLEAN AIR

Environmental Standards Scotland has issued an Improvement Report to the Government to address breaches of air quality standards.
